FROM INNOVATIONS TO APPLIANCES: Reflections on Educational Uses of Technology

presented by

Dr. Yong Zhao
Michigan State University

FRIDAY, OCTOBER 1, 2004
1:30 – 3 p.m.
Room 2121, Benjamin Building
College of Education

The past two decades witnessed dramatic changes in information and communication technology (ICT) and significant investment in putting ICT in schools. While researchers have often viewed technologies as innovations, today many of the technological innovations have become daily appliances for students and teachers.

Dr. Zhao discusses this major shift, which has significant implications for education and for R & D in educational technology. He is an internationally known author and researcher on technology in education.
